# Company Profile

DAKINI Environmental Consulting Pty Ltd registered private company in Australia. The company was started by three passionate and experienced environmental consultants based in Perth.

We are a consulting firm that offers scientific environmental monitoring requirements suited to your needs. Our experienced and qualified field scientists conduct regular soil, water, and gas monitoring to fulfill your compliance requirements. We strive to achieve excellence by offering services to small-scale regular environmental monitoring. Our team is dedicated to helping you manage environmental risks, achieve sustainability goals, and comply with environmental regulations.

DAKINI Environmental Consulting Pty Ltd is a registered private consulting company based in Australia. The company is managed by three experienced environmental project consultants, managed under the business Partnership Act of Australia 1895 under Australian Business No.87672350382. We strive to achieve excellence in small-scale regular environmental monitoring.

Our company strives to service small-scale projects with the delivery of quality results customized to your scientific testing requirements. We can provide technical field scientist for conducting routine environmental assessment services in fulfilment of compliance requirements. We will take full responsibility of regular assessment soil, water, and gas monitoring to fulfil your license requirements.
